Energy Agency Southeast - SWEDEN

ManagEnergy
Key figures

- **2008:**
  - Launch of the Covenant of Mayors
  - 6500+ signatories in over 50 countries
  - 200 million inhabitants represented (i.e. one third of the EU population)
  - 28% of average CO2 reduction commitment

- **2014:**
  - Launch of Mayors Adapt
  - 150 signatories in just one year, from 23 countries
  - 30 million citizens represented

- **2015:**
  - Launch of a new Covenant on mitigation & adaptation

ManagEnergy
Bottom-up initiative: results of the survey

**CO₂ EMISSIONS REDUCTION TARGET**

- **97%** Want the Covenant of Mayors to continue beyond 2020 with a new CO₂ target
- **84%** Call for a voluntary long-term CO₂ target
- **56%** Want at least 40% CO₂ reduction by 2030 as the EU target
- **58%** Are in favour of 80-95% CO₂ reduction by 2050 as the EU target

**ENERGY EFFICIENCY AND RENEWABLES**

- **81%** Are in favour of taking energy savings and renewable energy commitments
- **59%** Would like to see the same targets as the EU (at least 27% by 2030)
- **37%** Would like to see more ambitious targets than the EU

**CLIMATE ADAPTATION**

- **73%** Think that climate mitigation and adaptation should be brought together under one umbrella initiative
- **52%** Are in favour of climate adaptation as an optional commitment
- **48%** Are in favour of climate adaptation as a mandatory commitment
New Objectives?

NEW COVENANT OF MAYORS

Want:
- 42% 40% CO₂ reduction by 2030
- 27% energy savings by 2030
- 27% renewable energy by 2030
+ Adaptation

Want:
- 21% 40% CO₂ reduction by 2030
+ Adaptation

Want:
- 18% 40% CO₂ reduction by 2030
- 27% energy savings by 2030
+ 27% renewable energy by 2030

ManagEnergy
Launching an integrated Covenant of Mayors for 2030

A Shared Vision for 2050...
... and Renewed Commitments for 2030...
... translated into a series of steps:

MITIGATION
Accelerating the decarbonisation of our territories

ADAPTATION
Strengthening our capacity to adapt to unavoidable climate change impacts

SUSTAINABLE ENERGY FOR ALL
Increasing energy efficiency and the use of renewable energy sources on our territories

- (At least) 40% lower CO2 emissions by 2030 through improved energy efficiency and greater use of renewable energy sources;
- Increased resilience to the impacts of climate change;
- Increased cooperation with fellow local and regional authorities within the EU and beyond.

- Baseline review (i.e. Baseline Emission Inventory, Climate Risk & Vulnerability Assessment);
- Sustainable Energy and Climate Action plan and mainstreaming of mitigation/adaptation considerations into relevant plans within 2 years following the formal signing;
- Progress Report every 2 years following the submission of the plan.
