Danish Energy Saver of the Year
Heating

• **Gas consumption**
  Before: 1.400 m³
  Today: only 700 m³

• This saves the family for about 700 EUR annually!

• **How?**
  ✓ Regular monitoring and control of the energy consumption
  ✓ Change of daily routines (cooking, bathing etc.)
  ✓ A new window section
  ✓ Efficient use of the gas boiler
Electricity

• Before: 7.500 kWh
  Today: 2.800 kWh

• How?
  ✓ Elimination of standby consumption
  ✓ Installation of energy-efficient household appliances
  ✓ Use of low energy bulbs
  ✓ Change of daily routines (Efficient use of appliances etc.)
Small changes – big savings

- Improvements with low investments
- Changing the consumer habits
- A new window section
- Installation of energy-efficient household appliances

→ Cut consumption in half!
