eMobility works is...

...a European project realized under the program IEE (Intelligent Energy Europe) of the European Commission. The project is managed by the Austrian Grazer Energieagentur, with partners from 9 different countries across EU.

Drive the future!

The Project aim to integrate e-mobility in European Municipalities, strongly involving local business to ensure and lead a new decision making process in Municipal Administrations related to eMobility.

Do you know?

E-vehicles have, compared to conventionally fuelled vehicles, many advantages:

E-vehicles are more energy efficient (efficiency factor of a conventionally fuelled car is 20 - 30 %, while e-cars show an efficiency factor of up to 80 - 85 %)

E-vehicles may be easily supplied with all types of energy from renewable energy sources

E-vehicles reduce greenhouse gas emissions (if supplied with electricity from renewable energy source)

E-vehicles are very cost efficient in terms of operation and maintenance

E-vehicles cause low noise emissions (particularly at low speed)

A concrete possibility for all!

The current generation of e-vehicles is already of high technical and aesthetic quality, the automotive industry offers different types of e-vehicles for almost every purpose: Pedelecs, e-bikes, e-scooters, e-cars and even e-e-trucks in different sizes and designs are available in Europe
Implementation of e-vehicles

The e-Mobility Project will implement these actions to support Municipalities:

- Creation of a local network of Municipalities and enterprises working on e-mobility that will analyze and realize new concrete possibilities to ensure a good development.
- Municipal Action plans dedicated to e-mobility, elaborating innovative business services such as vehicles or recharging stations and financial schemes to support them.
- Implementation of e-mobility action plans with a strong engagement of local stakeholders.

Collaborate with us!

Are you an enterprise working in the e-Mobility sector?
Contact us to participate in the development and implementation of action plans in your region.

Are you a Municipality that will implement the future of the mobility in your city?
Contact us and we will provide you useful information and contact in order to realize your action plan.

Drive the e-future!
